

## Software Application Developer – C# / .NET

**Company:** SJV Technology Group, LLC

**Status:** Full Time, Employee

**Relevant Work Experience:** 2 to 5 years

**Education Level:** Bachelor's Degree

**Location:** Fresno, CA 93721

**Job Category:** Computers, Software

**Career Level:** Experienced (Non-Manager)

SJV Tech is a leading provider of technology services to clients in the Central California region. Headquartered in Fresno, CA, SJV Tech and its predecessors have provided technology-based solutions since 1971. Technology services include custom software application development and network infrastructure services. SJV Tech deploys a broad range of technologies and serves a diverse clientele.

### Job Description:

SJV Tech has a full-time position open for a software application developer. This position is responsible for analyzing, designing, programming, debugging, testing, documenting, deploying, and maintaining application software for SJV Tech clients. The position involves maintaining existing software deployments as well as the development and deployment of new software. At times the position will involve working with a team and at other times being the only resource on a project. Candidates must be self-starters and possess excellent time management skills as the position will require performing tasks for multiple projects and multiple clients. Direct client interaction and written project proposals are required so candidate must exhibit good verbal and written communication skills.

### Requirements:

- Relevant educational background
- 2+ years relevant software application development experience
- Must be able to work independently and as part of a team
- Must be able to handle the complexities of working on multiple projects simultaneously
- Good communication skills (verbal and written)
- Object-oriented software design skills
- Experience designing, deploying, and maintaining C# / .NET Framework Windows Forms applications
- Experience designing, deploying, and maintaining applications which store data in a relational database

### Desired Skills:

- N-tier application design experience
- Pattern-based development experience
- SQL Server database design
- Crystal Reports and/or XtraReports
- Devexpress Controls
- IdeaBlade DevForce
- ASP.NET
- Web Services, XML, SOAP, REST, WCF
- JavaScript, HTML
